PROFILE

Aspiring AI Engineer and GenAI Developer with hands-on experience in AI Automation, Large Language Models (LLMs), Prompt Engineering, and Full-Stack Development. Experienced in building AI-powered applications, workflow automations, and scalable AI solutions using modern cloud platforms and APIs. Skilled in integrating AI services, designing automated workflows, and developing end-to-end applications. Passionate about leveraging Generative AI to solve real-world business problems.

EDUCATION

Guru Gobind Singh Indraprastha University

Delhi, India

Bachelor of Technology in Artificial Intelligence and Data Science

2022– 2026

- CGPA : (8.81)
- Relevant coursework in [Database Management Systems, Operating Systems, Artificial Intelligence, Computer Networks]

SKILLS

Languages: Python, SQL, JavaScript

Generative AI: Prompt Engineering, Large Language Models (LLMs), AI Automations, Retrieval Augmented Generation(RAG), AI Workflow Automation, AI Agents

Cloud & AI Tools: Clerk Authentication, REST APIs, AI Integrations, Cloudinary

Tools : Git, GitHub, Vercel, Render, Netlify

Soft Skills: •Debugging and testing, •Problem-Solving

CERTIFICATIONS

- **AICTE (IBM)** Certification India 2024
- **Course Era (Meta Front End Developer)** Certification India 2025
- **Udemy (N8N AI and Automations)** Certification India 2026

EXPERIENCE

X Strategy Services , AI & Automation Intern | Noida

(March 2026 – June 2026)

- Developed AI-powered workflow automations using **n8n** to automate business operations and repetitive manual processes.
- Designed and optimized automation pipelines involving data processing, notifications, and business process orchestration.
- Integrated multiple third-party APIs and AI services to create intelligent automated workflows.
- Collaborated with stakeholders to understand requirements and implement scalable automation systems.

- Developed the “Mr .Food” food delivery platform, focusing on designing and building intuitive UI screens based on design briefs.
- Demonstrated strong analytical and design skills, quickly learning new technologies and delivering the project within deadlines.
- Maintained professionalism and exceeded performance expectations throughout the internship.
- Collaborated effectively with cross-functional teams, ensuring clear communication as well as smooth project execution

PROJECTS

LeadOS – AI APPOINTMENT BOOKING PLATFORM

- Built an AI-powered lead management and appointment booking platform using n8n workflows.
- Automated lead capture, qualification, follow-ups, and appointment scheduling.
- Integrated AI services and third-party APIs for intelligent customer interactions.
- Designed workflow automations that reduced manual intervention and improved lead conversion processes.
- **Technologies: n8n, AI APIs, Webhooks, CRM Integrations, React.js, Supabase**
- **Link: [LeadOS](#)**

AI INTERVIEW PREPARATION PLATFORM

- Developed an AI-powered interview preparation platform that generates role-specific interview questions
- Integrated LLM APIs to create mock interview experiences and AI-generated feedback.
- Built secure authentication and user management features.
- Integrated OpenRouter-based LLM models for dynamic response generation and feedback.
- **Technologies : React.js, Node.js, Express.js, MongoDB, OpenRouter API**
- **Link: [AI Interview](#)**

ACHIEVEMENTS

- TCS code Vita round 1 cleared
- Completed **Meta Front-End Developer Certification** and **AICTE IBM Cloud Internship**, gaining exposure to real-world tools and cloud platforms.
- Successfully completed a **Software Development Internship at DRST Digital RS Tech**, delivering the “Mr. Food” food delivery platform within deadlines.
